Range David Epstein Read ebooks [EN] PDF, ePub, Mobi, The instant *New York Times* bestseller that has all America talking: as seen/heard on CBS This Morning, The Bill Simmons Podcast, and more.

"Urgent and important. . . an essential read for bosses, parents, coaches, and anyone who cares about improving performance." —Daniel H. Pink

"So much crucial and revelatory information about performance, success, and education." —Susan Cain, bestselling author of *Quiet*

"As David Epstein shows us, cultivating range prepares us for the wickedly unanticipated... a well-supported and smoothly written case on behalf of breadth and late starts." —*Wall Street Journal*

A powerful argument for how to succeed in any field: develop broad interests and skills while everyone around you is rushing to specialize.

Plenty of experts argue that anyone who wants to develop a skill, play an instrument, or lead their field should start early, focus intensely, and rack up as many hours of deliberate practice as possible. If you dabble or delay, you'll never catch up to the people who got a head start. But a closer look at research on the world's top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule.

David Epstein examined the world's most successful athletes, artists, musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They're also more creative, more agile, and able to make connections their more specialized peers can't see.

Provocative, rigorous, and engrossing, *Range* makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.
